

Deployment guidelines during COVID-19

- If you have been near someone with COVID, don't deploy.
- If you are not feeling well, don't deploy.
- If you fear you might contract the virus, don't deploy.

We would rather have you stay home and be safe and healthy. You will be greatly missed, but there will be future deployments.

Procedures

- Your temperature will be taken and recorded twice daily. If you have a fever over 99.5 twice in a row, you must go home.
- Wear a face covering every time you are around others indoors. It may be removed while eating and sleeping. All feeding unit volunteers should wear a mask anytime in the field kitchen.
- Social distancing of 6 feet is recommended and every other dining table is to be used while eating.
- Food is to be served in individual containers by the feeding team.
- Frequent hand sanitizer use is recommended.
- Limit to smaller groups whenever possible. Deploy only the amount of volunteers to do what is needed.
- Overnight housing is limited to 110 sq. ft per volunteer.

Reminder:

- Personal Injury/Assumption of Risk and medical forms must be filled out. Complete the PI/Assumption of Risk form [online at TBMTX.org](https://www.tbmtx.org) once a year. Medical forms need to be completed for each deployment.
